Description

BRCA LEGAL

The heart of the Spec version is the optimized stator. After several different design approaches, we found what the unique Low Rider configuration needs for phenomenal power in the ultra competitive Spec classes. As the motor is inherently light, we could keep steel in critical areas to squeeze every ounce of power from the motor.

All Parts: SMC Low rider 13.5 brushless

In the SMC tradition, motors are NOT sorted to keep the best for ourselves. Every motor is factory sealed as assembled, to our exact tolerances, ensuring the "best" motors have not been cherry-picked from the lot.
