Description

NEW G2 - HR4 - ESC

New for the 2023 Season the New HR4

Testing now complete with the Mardave race Team ,

We are please to announce the release of the HR4. This ESC is designed and programed to our spec and is not in any other ESC's on the Market.

We have used New Higher power fets like in the HR3X for more reliabilty and now comfortably power the lower turn motors.

The HR4 run cooler and its software already used in the HR3 has been at the front of the field in many classes , and also has taken many championships in 2022. Finally we have added solder posts to the HR4 so that drivers can change and solder wires of there choice
