Description

NOTE Soldered into car and run once hence reduction but like new

The Hobbywing Xerun V10 13.5T G5 Black Motor (HW30401762) is a sensored 2-pole brushless motor for competitive 1/10th and 1/12th stock racing. With a 4050KV rating and support for 1–3S LiPo, it delivers smooth, consistent power and precise throttle response. The compact 35.8mm outer diameter, 51.5mm length and 3.175mm shaft make it a practical fit for stock class builds, while the 138g weight helps keep chassis balance in check.
