Description

# Its Back More PUNCH More POWER & with NEW Super soft Silicone wires as Standard

The New Oval ULTRA is a Brushed speed controller designed specifically for use in RC Oval race cars.

The Oval has a race stock motor limit of 15 Turns, what this means is that you can use any, DC Brushed 540 size race stock spec motor.

The Oval Ultra is the perfect speed controller for anybody wanting to upgrade their old stock motor speed control in their oval car, for a no nonsense race stock limited, reversible electronic speed control allowing you to run race stock motors to the highest performance possible!

The Oval Ultra is a one-off speed control that was designed for the Mardave range with the help of some of today's leading Oval race drivers! It has been tailored to get the very best out of any race stock motor, giving you more punch, acceleration and performance than you will have ever seen before, on top of the increased performance you get from the Oval Ultra, the controllers software has been designed by Mardave race team, with the help of multi national winning racers, to develop the best feel and power for racing.

On top of all the new features on the Oval, you still get all the usual protection you expect from a Mardave speed control! Motor stall protection, motor short protection and of course ..... they are 100% waterproof.

New Mardave ESC Speed Controller . Built to Mardave Oval spec and **not used by any other suppliers**. the only speedo to have Duo tech Fets for punch and reliability

The Mardave Oval Ultra Duo Tech Fets are exclusive to us and for Oval use . Works great in a 6 cell brushed saloon , 1300 4 cell Saloon , Banger , Rooky rods and F2's.

Very punchy and with full speed instant reverse .

Copied but never bettered
